Summary

Principal SDET with **11** years of experience in **Automation, AI-driven testing, and QA Leadership**. Certified **Microsoft Azure Fundamentals (AZ-900)** and **ISTQB** Certified Tester. Specialized in building automation frameworks from scratch, Adept at leveraging **AI** and **no-code** tools to streamline processes and enhance testing efficiency, leading teams, and managing end-to-end releases. Proactive problem solver with strong communication and stakeholder management skills.

Automation Expertise

- Designed and developed **scalable automation frameworks from scratch** using **Playwright, Selenium, BDD, TestNG, Nunit, SpecFlow, PyTest, Robot framework, Data-Driven & Hybrid models**, covering Web, Windows, API, Database, ETL, PDF, and UI testing.
- Strong experience in **Windows automation** using **TestStack.White, Appium, WinAppDriver, and FlaUI**.
- Integrated automation frameworks with **CI/CD pipelines (Azure DevOps, Jenkins)** enabling seamless test execution within build and release workflows.
- Performed **Security, Accessibility (JAWS, NVDA, AMP, WAT)**
- Strong expertise in **debugging, log analysis, and root cause identification**.
- Automated repetitive workflows using **Java utilities, Macros and Python scripts**

AI & Innovation

- Developed **Playwright Automation Runner, No-Code Automation platform**, and an **AI-powered chatbots** to enhance productivity and enable non-technical stakeholders.
- Leveraged **LLMs, Python, DeepEval**, and **RAGAS** for intelligent test generation, defect analysis, **LLM/RAG validation**, and AI-driven test optimization; integrated with **GitHub Actions, Workflows, and MCP servers** for AI-powered CI/CD automation and intelligent pipeline orchestration.

Leadership & Release Management

- Serving as **Principal SDET**, leading QA strategy, automation initiatives, and end-to-end release closure.
- Managed and mentored Dev & QA teams (**up to 6 members**) while driving **sprint planning, grooming, standups, troubleshooting, and resource allocation**.
- Owned **work prioritization, stakeholder collaboration, vendor coordination**, and successfully onboarded complex applications with minimal prior knowledge.

Tool and Technologies

Web Automation	Selenium WebDriver, Playwright , TestNG, NUnit , SpecFlow, PyTest
Window Automation	TestStack.White, Appium, AutoIT, Sikuli, WinAppDriver, FlaUI
Artificial Intelligence	ChatGPT, Claude, Gemini, GitHub Copilot, TestMU AI (Lambda Test), Ollama (Local LLM), MCP Servers, DeepEval, Ragas and GitHub Actions and GitHub Workflows
API & Performance	Postman, JMeter, BlazeMeter, Swagger, Rest Assured, HTTP client
Test Management tools	Azure Devops, JIRA, Xray, TDP, HP ALM and CA agile rally
Cloud & Database	Azure, AWS, Github, Docker, SQL server, SSAS MDX, Blob, CosmosDB, Redshift and Firebase
Programming Languages	Java, C#, Python, Typescript, JavaScript, HTML, CSS and Android
Log analyser tools	App Insight, Datadog, WinSCP, Splunk, Putty and AppDynamics
Additional tools	JAWS, NVDA, WAT tool, Inspect element analyser, AMP, Firebug and ICDT

Project Portfolio:

InsightSoftware International Pvt Ltd

(April 2023 to June 2026)

Project: **Calumo** | Domain: **Finance & Reporting** | Designation: **Principal SDET** | Company : **Product Based**

Description: Calumo is a cloud-based financial planning and analytics tool used for reporting, budgeting, and forecasting. It enables organizations to automate data integration, build interactive dashboards, and generate real-time insights. The platform helps reduce manual Excel work and improves data-driven decision-making.

Role and Responsibilities:

- Automated testing of Calumo using **C# and Typescript, Playwright/Selenium** for UI and backend validation of financial reports and dashboards.
- Developed and executed **LLM validation and evaluation** using **Python, DeepEval, and RAGAS**, validating **response quality, relevance, faithfulness, and hallucinations** for AI/RAG applications.
- Designed **scalable automation frameworks**, integrated with **TestMU AI (LambdaTest), Azure, and CI/CD pipelines**, ensuring high-quality releases in Agile environments.
- Performed **API and integration testing** across multi-tier applications, including **third-party/vendor risk systems** and backend services on **Linux/AWS**.
- Validated **budgeting, forecasting, and financial reporting workflows**, with focus on data accuracy in a **cloud (Azure) environment** and CI/CD pipelines.
- Provided **team mentoring and technical ownership**, driving automation best practices and delivery.
- Owned **sprint commitments, release closure, and stakeholder reporting**, ensuring timely delivery and effective communication.

Trantor Software Pvt Ltd.

(May 2021 to March 2023)

Project: **MetricStream** | Domain: **GRC** | Designation: **Senior Test Analyst** | Company : **Product Based**

Description: MetricStream is a cloud-based GRC platform used to manage risk, compliance, and audit processes in enterprises. It centralizes data, automates workflows, and provides real-time insights for better decision-making.

Role and Responsibilities:

- Built **BDD-based automation framework using Java, Cucumber, and Selenium**, enabling readable test scenarios for business stakeholders.
- Automated **REST API validation** for compliance workflows using **Rest Assured**, ensuring accuracy of risk scoring, control validations, and audit data.
- Performed **database testing (SQL)** to validate backend data consistency across risk and audit records.
- Validated **workflow-driven applications** (approvals, escalations, issue tracking) with focus on **business rule validation and data integrity**.
- Worked closely with cross-functional teams to **analyse regulatory requirements** and convert them into effective test scenarios.
- Supported **production releases, defect triage, and root cause analysis**, ensuring minimal impact on compliance-critical systems. Executed System, Integration, and UAT testing.
- Contributed to Agile sprint cycles and test planning activities.

FIS Global

(April 2020 to May 2021)

Project: **ServiceLink** | Domain: **Mortgage** | Designation: **Senior Test Analyst** | Company : **Product Based**

Description: ServiceLink is the premier national provider of transaction services to the mortgage and finance industries. ServiceLink delivers valuation, title and closing and flood services to mortgage originators; end-to-end subservicing to mortgage servicers; and default valuation

Automation Testing: Involved in creation and writing automation scripts for functional testing, API automation and Database automation.

Role and Responsibilities:

- Test Design and Creation of test scenarios and test cases for manual and automation testing.
- Involved in Grooming calls.
- Involved in Performance test script creation using JMeter and integration with Amazon service cloud watch.
- Creation of UI Automation Scripts using Selenium Web Driver using Java.
- Leading the QA team of Project. Involved in sprint planning and grooming calls.
- Created requirement traceability matrix.
- Created automation testing suite for API automation testing using Rest assured.
- Tested API using swagger.
- Review requirement documents, Quality approach document, test plan document.

Maven Wave Partners**(April 2019 to April 2020)**

Project: Miller Heiman Group | Domain: Sales | Designation: Technical Specialist | Company : Service Based

Description: Miller Heiman Group company that invented modern selling, we help sellers to stay one step ahead, even while business is rapidly changing. Also provides the sales training, consulting, technology and research sellers need to stay one step ahead of disruption.

Automation Testing: Involved in creation and writing automation scripts (Automation using Selenium WebDriver with Data driven, hybrid and TestNg Framework).

Role and Responsibilities:

- Key analysis on the reported issues and providing workaround for errors. Documentation of the root cause and routing cases to the resolver group.
- Creating and Executing SQL queries based on application requirements.
- Daily checkouts.
- Responsible for keeping Morgan Stanley application up and running.
- Handling all End User Incidences/Requests/Problems related to account.
- Logs analysing using Splunk tool.
- Created dashboards for overall health monitoring.
- Maintaining servers and responsible for load balancing.
- Involved in deployment activities.
-

Infosys Limited**(Aug 2015 to March 2019)**

Project : AT&T , Morgan Stanley | Domain: Telecom and Banking | Designation: Test Engineer | Service Based

Description: AT&T is an American multinational telecommunications conglomerate. AT&T is the world's largest telecommunications company and second largest provider of mobile telephone services and the largest provider of fixed telephone services in the United States and provides broadband subscription television services through DirecTV

Role and Responsibilities:

- Test Design and Creation of test scenarios and test cases for manual and automation testing using QC.
- Automated Regression and Sanity Test Suites.
- Creation of Automation Framework and Scripts using Core Java.
- Creation of SQL queries for retrieving data from DB32.
- Creation of UI Automation Scripts using Selenium Web Driver.
- Checking build & code deployment status using Jenkins.
- Continuous Delivery Process (GitHub and Jenkins).
- Test Executions in HP ALM and Automation Scripts Execution and Analysis.

Achievements

- Organization Level - **INSTA Award** Winner for Outstanding Performance in a quarter in Infosys
- Received **PAT on the back Award** for excellent and **Team award** in Maven wave.
- **Out of Box Brain** Award in FIS
- **Employee of the Quarter** award in Trantor.
- Employee of the Quarter award in 2023 and 2025 **INSIGHTSOFTWARE**

Academics

Year	Institutes	Degree/Certificate	Percentage
2011-2015	Punjabi University, Patiala	B.Tech in ECE	77%
2010-2011	V.H.R.M. Sen. Sec. School, Patiala	12 th	74%
2008-2009	K.J. Model high School, Patiala	10 th	76%
